

## EXPRESSION OF INTEREST

### *Management & Operation of the National Renewable Energy Laboratory* (DE-RP36-07G097036)

Lockheed Martin (LM) expresses interest in submitting a bid to become the prime contractor for the Management and Operation of the National Renewable Energy Laboratory (NREL).

Areas of LM expertise that support the success of NREL's mission include:

- LM is the largest Federal government contractor, with sophisticated financial and program management procedures in place to ensure strong management results;
- LM can leverage the experience of over 140,000 staff who specialize managing large engineering and information technology projects;
- LM is experienced in managing Department of Energy laboratories, we currently manage Sandia and Knowles;
- LM is part of the progressive energy industry through our management of residential, commercial and industrial DSM and market transformation programs for several large electric utilities, DoE EERE, EPA Energy Star, NYSERDA and FERC;
- LM is experienced in research and deployment of renewable technologies through our Department of Defense and National Aeronautics and Space Administration projects; and,
- LM is also well known for its success in transferring technology from the laboratory to the private sector.

The Lockheed Martin point-of-contact for this opportunity is:

Mark Hopkins, Business Development  
Lockheed Martin  
Business Process Solutions, Energy and Security Services  
2277 Research Blvd.  
Rockville, MD 20850
